OLAV

THE MODEL PROPOSES. CODE DECIDES. YOU APPROVE.

An open-source training coach on Telegram. Every morning it reads your Garmin and your calendar and adapts your week on its own. It only ships a workout to your watch after the rules pass and you say **approve**. First athlete: me. Half marathon in December, 8 hours a week, Forerunner 965.

WEEK OF OCT 19

0 H 00 OF 8 H

MON 19	REST DAY
TUE 20	18:00–21:00 Events
WED 21	15:00–17:00 Pickleball
THU 22	23:59 Red-eye flight
FRI 23	REST DAY
SAT 24	
SUN 25	

Google Calendar via Composio. Hatched blocks are your real events.

Replay of a real session on Oct 19, 2026: the author's own Garmin and calendar data, tool results condensed from the real run, chat condensed and translated from Portuguese. Garmin writes verified live with test workouts.

BEFORE IT SAYS A WORD, IT READS YOU

SYNCED 94 MIN AGO
Data is fresh enough to plan on.

GARMIN · FORERUNNER 965

SLEEP 86 · 8 H 22
Best night of the week.

GARMIN · LAST NIGHT

READINESS 51
Moderate, after yesterday's ride.

GARMIN · TODAY

4 H 00 RIDE · HARD
Aerobic effect high enough to count as hard.

GARMIN · SUNDAY

LAST WEEK 9 H 26
Over the 8-hour weekly cap.

OLAV · VS YOUR WEEKLY CAP

TRAVEL WEEK
Tue events 6–9 pm · Wed pickleball 3–5 pm · Thu red-eye 11:59 pm

GOOGLE CALENDAR · VIA COMPOSIO

SLEEP SAYS GO. READINESS SAYS EASY.

WEEK OF OCT 19

0 H 00 OF 8 H

MON 19	REST DAY
TUE 20	18:00–21:00 Events
WED 21	15:00–17:00 Pickleball
THU 22	23:59 Red-eye flight
FRI 23	REST DAY
SAT 24	
SUN 25	

Google Calendar via Composio. Hatched blocks are your real events.

Replay of a real session on Oct 19, 2026: the author's own Garmin and calendar data, tool results condensed from the real run, chat condensed and translated from Portuguese. Garmin writes verified live with test workouts.

IT KNOWS WHEN TO SAY NO

Make it harder. Intervals Tuesday, tempo Wednesday, a 3-hour ride Saturday.

OLAV

I get it, you want more. But a 3-hour ride is past your 2 h 30 limit, and two hard days back to back is how injuries start. Your body is still recovering from Sunday. Let's do intervals Thursday and 2 h 30 on Saturday.

Replay of a real session on Oct 19, 2026: the author's own Garmin and calendar data, tool results condensed from the real run, chat condensed and translated from Portuguese. Garmin writes verified live with test workouts.

ONE WORD SHIPS IT

approve

```
wearable-mcp apply_plan("3457dd270f") → create → schedule → push to device
Composio 7 × create event "[Coach] …"
```

OLAV

Sent. Tuesday's run is on your Forerunner with warm-up, Z2 and cool-down steps, and all seven sessions are on your calendar around your events and the flight.

OPEN, END TO END

TELEGRAM
Where you talk to your coach. A daily cron check-in plus anything you ask.

HERMES AGENT
Open-source agent runtime in Docker. The **training-coach** skill runs the five-step loop and the approval rule.

WEARABLE-MCP
Ours, in Python. Garmin reads and writes, **guardrails.py** enforcing the limits you confirmed at onboarding, and two-phase writes: propose_plan stores a hashed plan, apply_plan executes exactly that plan. Brand-agnostic provider interface.

COMPOSIO
Google Calendar: free slots, events, and the [Coach] entries.

PARALLEL
Web search when the plan needs the outside world, like a hotel gym on a trip.
